Predictions for 2025 - Maryfield School Grades 3 to 6

My year's predictions are... The war with Ukraine and Russia will stop. The mail will not have a strike anymore. Gas and stuff we need will keep getting more expensive. They will invent flying cars. The icebergs will melt. Those are my New Year's predictions.

*Shayle Botterill
Grade 6*

In 2025 I think Pierre Poilievre will win the election. My second theory is that the Florida Panthers will win the Stanley Cup. My third prediction is the mail strike will go on until February. My fourth prediction is there is going to be a big government strike in Canada that will go into 2026. My fifth and final one is that gas cars will be banned from driving.

*Anthony Gray
Grade 6*

I predict that in 2025 a cure for cancer will be created. I also predict that a disease will come, but not be as serious as Covid-19. Third, I also think a and good social media platform will be created. Fourth, I predict a sport will be made and it will become world famous. Another thing is that there will be a massive strike all across a big government in North America. I also predict that the war with Ukraine will end or become a massive WWII. I predict that Trudeau will lose the election, and a better party will win. Another thing is that a game will be created that is better than Minecraft. Lastly, I predict and hope for a really good Minecraft update.

Next year there will be a festival named Hands across Maryfield, it is where people bring all sorts of food and when I say Hands across Maryfield it means that everyone holds hands in a straight line down Main Street. My second prediction for New Year's is to get every homeless person a little wooden house, kind of a bigger version than a doghouse, but I would do that if I was the Prime Minister. The mayor of the town will have lots and lots of holidays so everyone will always be happy. In 2025 there will be a holiday

called, "Pray for the Holy Gods," and everyone would sit in a circle and say their prayers for their god. In 2025 we should, and will get a new Prime Minister. In 2036 robots will replace human beings for all jobs, but you would still get money from the robots working for you. In 2045 there will be flying electric cars roaming around the world. In 2027 there will be a person that will rule the world until they die and then their closest family relative would take over.
